

CHAIRS FOR EVERY BODY

High Back Chair

Low Back Chair

Medium Back Chair

Brigger chairs provide ergonomic comfort. The seat follows the contour of the body with soft support under the knees, adjustable lumbar support, and support of the back with a choice of back heights.

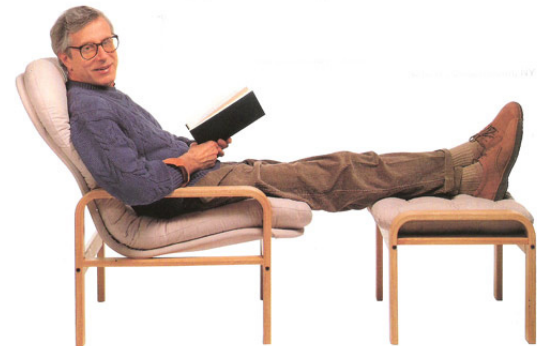

HIGH BACK CHAIR

High-back chairs provide support for the whole body, including the shoulders, neck, and head. They are great chairs when you are concerned about your very personal comfort and relaxation.

MEDIUM & LOW BACK CHAIRS

Medium Back

Chairs without a headrest are great for general sitting areas in homes or offices. They come in two versions: Medium back chairs provide back support to the shoulders for tall persons, and neck and head support for shorter ones. Low back chairs with their lower overall profile and excellent lumbar and lower back support make attractive general purpose chairs for relaxed sitting in homes or public places. Medium and low back chairs come in standard sizes for general sitting areas but can be customized in size to fit your body or personal needs.

POSTURE

Posture is an important comfort feature of high-back chairs. Unless you choose otherwise, we provide the relaxing Normal posture which we found most customers will enjoy spontaneously when settling into a high-back chair.

We offer two additional options: If you prefer to raise your legs on a Leg Support or Ottoman (see Accessories), the Comfort posture will be a very relaxing option as it supports a naturally reclined body posture. However, if you prefer to sit as straight as possible you may want to select the Upright posture option.
