POSTURE

Posture is an important comfort feature of high-back rockers. Unless you choose otherwise, we provide the relaxing Normal posture which we found most customers will enjoy spontaneously when settling into a high-back rocker.

We offer two additional options: If you prefer to raise your legs on a Leg Support or Ottoman (see Accessories), the Comfort posture will be a very relaxing option as it supports a naturally reclined body posture. However, If you prefer to sit as straight as possible you may want to select the Upright posture option.
